Structured Umbrellas

World Leaders in Commercial Umbrellas

Simple Innovative Affordable

Superior International Industries proudly introduces a revolutionary new product line to the recreational industry, Skyspan Umbrella Structures.

Manufactured in Carrollton, Georgia, Skyspan is the industry leader in the design, manufacture, and installation of commercial outdoor umbrellas.

All of our umbrella structures are 100% UV rated and waterproof and come in a wide range of sizes to fit every budget. They can be custom designed to suit every client's needs, with personal add-ons available such as heaters, plastic drop down curtains, screen printing, and lighting to name a few. The canopy is also available in a large range of stunning colors to match any décor or compliment a logo.

Skyspan umbrella structures are designed to be long lasting and able to withstand wind gusts of up to 93 mph, depending on the model, and ingeniously designed for ease of both installation and client use.

The structure consists of solid powder coated structural aluminum frames and arms or structural grade steel masts. The PVC coated flame retardant fabric of the umbrella prevents airborne dust and pollution from going through the fabric, making it virtually self-cleaning. A stainless steel cable is concealed into the perimeter of the canopy to give the classic curved profile that makes the look of Skyspan so appealing.

More Special Features and Benefits

- Aesthetically pleasing and low maintenance
- 10 year anti-rust guarantee on Sunset & Horizon Range
- 2 year warranty on canopy
- 5 year warranty on frame
- 1 year warranty on portable model
- Improves visibility and appearance of any setting
- Significantly reduces temperature of covered area
- Highly affordable, attractive protection for outdoor areas

Sunset

The Sunset Range is Skyspan's most popular range of umbrellas. These retractable umbrellas are engineered to withstand winds of up to 75mph when opened and 93 mph when retracted. The brilliance of this range is that in high winds or ominous weather, the umbrellas can be retracted in moments, so easy a small child could do it. The unique gearing mechanism concealed inside the umbrella column allows the umbrellas to be retracted effortlessly and smoothly with a removable handle, ideal for cafes and restaurants that require a retractable structure.

Sunset Shapes and Sizes:

- Square: 10ft., 12ft., 13ft.
- Hexagon: 14ft., 16.ft., 18ft.
- Rectangle: 10ft. x 13ft.

Horizon

Skyspan's Horizon Range non-retractable umbrellas are engineered and manufactured using state of the art materials that provide strength, elegance and durability.

The combination of structural grade aluminum frames with translucent architectural grade PVDF skins, suitable for the harshest of conditions and wind rated to 75 mph, makes the Horizon Umbrella truly unique. Ideal for all commercial applications

Horizon Shapes and Sizes:

- Square: 10ft., 12ft., 13ft.
- Hexagon: 14ft., 16ft., 18ft.
- Rectangle: 10ft. x 13ft.

Vista

The popular Vista cantilever range is a solid and strong umbrella structure with one distinct advantage, no center post. For covering swimming pools, spas, and much more, look no further than this model. Made from hot dipped galvanized structural steel and powder coated to your choice of color, they are wind rated to 75 mph, and like the Sunset Range, fully retractable and able to pivot 360 degrees. The pivoting base is perfect for utilizing the shade at varying times of the day or for covering more than one area.

Vista Shapes and Sizes:

- Square: 10ft., 12ft., 13ft., 16ft.
- Hexagon: 14ft., 16ft., 18ft.
- Rectangle: 10ft. x 13ft.

Panorama

Skyspan's Panorama Range are fixed perimeter framed umbrellas that have been designed, engineered and manufactured using state of the art materials that provide strength, elegance and durability. This unique structure is suitable for the harshest of conditions by combining structural grade steel frames with architectural grade PVDF skins which are wind rated up to 93 mph.

The Panorama range has been designed to incorporate a clear drop curtain with a water flow controlled gutter system that can be attached to the perimeter frame providing the ultimate outdoor entertaining solution for all seasons. The use of multiple square edged fixed umbrellas joined together can create a fully waterproof large outdoor area.

Panorama Shapes and Sizes:

- Square fixed: 10ft., 13ft., 16ft., 20ft.
- Square cantilever fixed: 10ft., 13ft., 16ft., 20ft.
- Square gazebo fixed: 16ft., 20ft., 26ft.

Skyspan Features

Skyspan's concealed stainless steel perimeter cable gives the canopy its curved contemporary profile. Designed to last – marine grade, heavy duty and low profile aesthetic materials have been used. Straight side options are available.

Umbrellas are shipped preassembled and pre-tensioned, ready for on-site installation. They can be installed into virtually any location, including concrete, paved or wooden surfaces. Aluminum base plates are pressed and screwed to the frame before the powder coating process.

The Skyspan Sunset “Easy-Wind” Retractable System has been specifically engineered to be low maintenance. The original and innovative rack and pinion gear mechanism ensures ease of operation for years, and the anti-jam crank lift allows canopies to be opened or closed in minutes. The unique locking mechanism allows the umbrella to be locked in the open position for safety when used in public spaces. Removable handle leaves a clean aesthetic appearance and prevents guests and staff from operating without authorization.

Skyspan Umbrellas are pre-wired internally to allow both up and down lighting to be fitted at time of purchase or retrofitted later.

The heating system available for Skyspan Umbrellas allows full retraction of the product with no interference.
