

WOODCARPET® SYSTEM 1 PLAYGROUND SURFACE

ZEAGER was the first in the industry to offer engineered wood surfaces for playgrounds – and is still the standard by which all others are measured. Our ease of installation, attention to safety standards, and consistent quality assures that only the very finest materials will protect your playground for many years to come.

And our exclusive network of production facilities throughout the 50 states and Canada keeps delivery costs low and the quality very high for each of our loyal clients.

SYSTEM 1

✔ **First American Manufacturer of Engineered Wood Safety Surfacing**

✔ **Easy Maintenance**

✔ **Simple Installation**

✔ **Natural Beauty**

✔ **Renewable Materials**

✔ **System Discounts Available**

Our Surfaces Are Third Party Certified!
We Ship to All 50 States, 8 Canadian Provinces and Mexico!

We are very satisfied with Zeager Woodcarpet and they have been very accommodating to our surfacing needs. We had noted that the Woodcarpet is lasting longer than we had expected, not washing out and staying in place. We have not had any incidents using Woodcarpet in our playgrounds and would recommend their product and services to others.

**Portsmouth Public Schools
Department of Operations
Portsmouth, Virginia**

Great for Playground Safety, the Environment, and Your Budget. WoodCarpet® is **Still** the Overall Value Winner!

ALL of Our Surfaces MEET or EXCEED Requirements for ADA!

DURALINER®
6' x 250' roll

PRODUCED LOCALLY
WoodCarpet is Produced in the South
with Recycled Wood Shavings
and Sawdust

MAINTENANCE RECOMMENDATIONS

Daily
1. Visually inspect and remove all foreign material (trash, stones, branches, etc.).

Weekly
Rake the WoodCarpet as necessary to keep the surface level and the depth sufficient throughout the play area. WoodCarpet Mat will reduce or eliminate the need to rake the WoodCarpet.

Monthly
1. In the highest use areas, dig down to the subsurface or drain system and measure the depth of WoodCarpet and/or Bonded WoodCarpet. Top off as needed.

2. Check the depth of WoodCarpet under each WoodCarpet Mat. Add more WoodCarpet as needed.
3. Check for and secure any loose WoodCarpet Mats. Ensure that WoodCarpet Mat edges are sloped down and covered with WoodCarpet or

Bonded WoodCarpet so as not to create a trip hazard. Some WoodCarpet Mats are not required to be anchored.
4. Check for and repair any cracks, tears and general wear.
5. Check for and ensure that water is flowing from a drain system outflow pipe immediately after a rain.

Notes:
1. WoodCarpet contains fresh wood. Fresh wood contains tannins, which are a natural preservative found in living plants and trees that rain will eventually wash out of the WoodCarpet into the drain system. This dark brown residue is externally harmless to humans and should gradually diminish.

2. During freezing conditions, all of our playground surfaces will naturally be less resilient, particularly with poor drainage. Restrict use of the area accordingly.
3. A complete set of maintenance instructions, are available at www.zeager.com.
